XINLEI COMPRESSOR CO.,LTD.

XL SERIES SCREW AIR COMPRESSOR

- Easy to operate
- Integrated direct connection
- Quiet and low noise
- Intelligent Internet of Things

Focus on the customer's challenges and pressures. Provide competitive air energy system solutions and services. Continue to create maximum value for customers.

Founded in Zhejiang, China in 2006. Xinlei is a high-tech enterprise with independent research and development intellectual property rights covering the whole fluid field such as piston, screw and centrifugal. We focus on aerodynamic full-scenario digital and intelligent solution, strive to be a world-class enterprise with world-class standards, create and share digital and intelligent fluid ecology with global customer partners.

AIR FOR ALL

**XINLEI
COMPRESSOR
CO.,LTD.**

- 110,000+m² floor area
- 800,000+ units yearly production
- 100+ sales area
- 300+ patents
- 300+ product specifications
- 260+ high quality precision equipment

COMPANY HONOURS

Draft 2 national standards & 4 industrial standards

- High-tech enterprise
- National Development and Reform Commission National Key energy-saving and low-carbon technology Promotion Catalogue yearly continuous
- Zhejiang first batch of domestic and foreign trade integration "pacesetter" enterprises
- Ministry of Industry and Information Technology "Energy Efficiency Star" equipment product catalog yearly continuous
- National Torch Program Project Certificate
- Vice president unit of China General Machinery Industry Association
- The sixth council of China Equipment Management Association
- Member of China Chamber of Commerce for Import and Export of Mechanical and Electrical Products
- National Energy Efficiency Labeling Testing Laboratory
- Petrochina and Sinopec Engineering Research Association-Air Compressor Technology Center
- Zhejiang Provincial Enterprise Research Institute of Xinlei Fluid Machinery
- Zhejiang export famous brand & "Made in Zhejiang" Standard
- 2020 Excellent supplier in cement industry
- 2021 China's industrial aquatic innovation equipment
- Energy-saving products benefits project high energy efficient positive displacement air compressor promotion enterprise

COMPANY EVENTS AND DEVELOPMENT

Zhong Renzhi
Chairman

EMBA from Shanghai Jiao Tong University;
Deeply plow in the field of aerodynamics;
Proposed a number of industry break-through issues;
Applied for more than 200 patents.

Yuan Jun
CTO

Contract Energy Management Engineer (Senior),
Engaged in the air compressor industry for nearly 20 years;
Mainly waiting for a number of air energy full-scene implementation plans, claiming 120+ patents.

Shen Yiming
PD

Nanyang Technological University (NTU), Singapore: Ph.D. and Postdoctoral Fellow in Electrical Engineering. He has been engaged in the research of magnetic levitation linear propulsion systems and direct-drive precision servos for a long time. He has presided over one youth project of the National Natural Science Foundation of China (NSFC). He is also the chair of two special and upper-level grants from the China Postdoctoral Science Foundation. He has published over 40 SCI/EI papers in critical academic journals and conferences at home and abroad. Authorized more than 10 invention patents.

RESEARCH & DEVELOPMENT TEAM

PROCESSING STRENGTH

From raw material procurement, spare parts processing, complete machine assembly to performance testing, Xinlei always strict with quality control. The company has the world advanced MAZAK high-precision machining center, KAPP rotor grinder machining center, high-precision ZEISS CMM and robot configuration refinement processing center, to build Xinlei a refinement and advanced production&processing center, to ensure the core components of self-research and production, and the high efficiency collaborative accuracy.

260+

high quality precision equipment to guarantee the high quality of products

○ MAZAK high precision machining center

○ KAPP rotor grinder machining center

ZEISS three-coordinate ○ testing center

○ Fine machining center

XINLEI AIR ENERGY
ALL PERIODS SOLUTION

TOTAL
SOLUTION

01

Pre-sales engineers
plan and consult

Customer interview/demand survey

Technical communication and
product demonstration

02

Project investigation
and confirmation

Customized scheme selection/
project team

Whole process of tracking and
completion

03

Delivery guarantee

Offline site testing

Focus on actual demand

Flexible reforming scheme

04

After-sales engineers
worry-free

24 Hours 400 hotline

Lightweight work order access by Wechat

Full technical Q&A videos

Xinlei air Full scene digitization

Digital energy management
for your plant

REMOTE MONITORING SYSTEM

Full-scene+Intelligent+One-stop

Functional Framework |

Data Visualization

- Visualization of equipment operating status
- View real-time working status

Digital Operation&Maintenance

- Equipment Asset Management
- Cloud platform warning control
- Inspection, maintenance

Real-time data acquisition

- Automated Meter Reading
- Air consumption statistics

Intelligent Optimization

- Cost optimization
- Quality optimization

Data Reports

- Customized Data
- Customized icons

Remote intelligent control

- Remote management of air compressor stations
- Intelligent regulation of equipment

IOT TECHNOLOGY

IOT Technology is an intelligent management software based on industrial internet technology, specifically for air compressors and ancillary equipment, providing intelligent digital sales as well as operation and maintenance capabilities for equipment manufacturers, agents and users in this industry chain.

PRODUCT FUNCTION

Equipment digital intelligence; through IIOT technology, real-time monitoring of equipment data and active fault alerting, helping manufacturers to upgrade from producing "dumb" equipment to intelligent equipment;

Sales Intelligence; efficient management of business opportunities, contracts, orders and other sales operations through first-to-speak tools;

Service digital intelligence, based on IOT technology, can achieve a closed-loop service of remote inspection, diagnosis, repair, and equipment upgrade.

CORE EQUIPMENT

Air compressors
WIFI base station
Cloud server
Various smart meters
Human-computer interaction screen
Gateway module

Ps: Customized special models considered separately

DIGITAL INTELLIGENCE SCIENTIFIC ENERGY SAVING MANAGEMENT SCHEME

Safe production, scientific energy saving, consumption reduction and efficiency increase, lean management

- Visualize equipment running status and view real-time working status
- Real-time energy consumption monitoring and data collection
- Statistical analysis of gas data to help enterprises make business decisions
- Equipment remote management, intelligent joint control
- Use gas on demand to avoid wasting energy
- Daily record of equipment operation, maintenance and daily management are more convenient
- Stable air pressure, scientific energy saving of the whole

INTERNET OF THINGS

The core components are 85% patented High precision integrated coordination

Energy-saving profile optimization

Through in-depth analysis of energy-saving needs and continuous optimization of product structure, Xinlei's technical team has continued to upgrade the V series profile with years of technical accumulation. With its high volumetric efficiency, reasonable drive contact points and small area of the exhaust side leakage triangle, this line has become one of the more energy-efficient lines in the screw line sector.

MAZAK Machining center precision machining

Coaxial all-in-one design

The host and motor share a shaft design, without intermediate transition parts, such as a centre bracket, coupling, pulley, gear, etc. Transmission loss is reduced to zero, **and transmission efficiency is 100%**

High-efficiency screw host

The host adopts a new generation of the asymmetrical profile, 5:6 spiral rotor, from line seal to seal technology upgrade, improving gas production efficiency and large rotor diameter. Low speed ensures that the host noise is small and long life.

High-efficiency permanent magnet synchronous motor

No rotor slip, no electrical excitation, no fundamental iron and copper losses in the rotor and less heat generation, reducing stator current and stator resistance losses-IP55 protection grade ensure safe and reliable equipment operation. The motor has a **5-8% higher efficiency** compared to asynchronous motor of the same capacity. High motor efficiency is maintained especially at low speeds.

INNOVATION

WHOLE STRUCTURE

XL series single-stage screw air compressor

High-efficiency filtration system

- Efficient oil-gas separator so that exhaust oil content is less than 3ppm;
- High precision oil filter to ensure the good oil supply state of the host, better protect the host, and prolong the service life of the host;
- High-efficiency vertical air filter to ensure the whole internal system of the compressor, clean and protect the rotor of the host, bearing to avoid wear and prolong the life of lubricating oil;

High efficiency inverter

- Adopt high-performance vector control technology, high accuracy of speed stability, speed range factory;
- High-speed output under vector control;
- Low-speed torque, small torque ripple;
- A variety of motor drives;

WHOLE STRUCTURE

High-efficiency air-cooled permanent magnet motor

- IP55 protection grade ensure safe and reliable equipment operation. Easy to maintain, permanent magnet efficiency. The motor has a 5-8% higher efficiency compared to asynchronous motor of the same capacity.
 - The host and motor share a shaft design, without intermediate transition parts, such as a centre bracket, coupling, pulley, gear, etc.
- Transmission loss is reduced to zero, and transmission efficiency is 100%

Touch the big screen Superior man-machine experience

- Visual display on-site, mobile phone and computer simultaneously, synchronous display of users, service providers and manufacturers: operation status, operation data, fault warning, etc.;
- Real-time online monitoring of pressure, power, and temperature fluctuations;
- Optional IoT Technology.

High-performance cooling system

- High heat dissipation efficiency, ensuring high temperature and humidity 24-hour continuous operation in the environment

XL SERIES

Single Stage Screw Compressor

Noise reduction design

-all-in-one structure + Vibration damping design + flexible exhaust pipeline, good balance of rotor movement, small vibration, low noise

Integrated direct connection technology

-No intermediate transition such as center bracket, coupling, pulley, gear and other linkage components. Transmission zero loss. Transmission efficiency 100%

Optional IOT

-Option IOT remote control, Intelligent air energy operation and maintenance platform

Air cooled high efficiency permanent magnet motor

-No rotor slip, no electrical excitation, no fundamental iron and copper losses in the rotor and less heat generation, reducing stator current and stator resistance losses
-IP55 protection grade ensure safe and reliable equipment operation. The motor has a 5-8% higher efficiency compared to asynchronous motor of the same capacity.

XL SERIES

Special Matching Use Air Compressor Unit

Combined all-in-one design

-Integrated air compressor, air dryer, air tank, high efficiency filter. No need install piping. Plug and use. Reduce pressure loss in dry air output

Energy-saving drying system design

- Reduce pressure loss of dry air output
- Provide dry compressed air solutions

Noise reduction and vibration damping design

-Adopting a vibration-damping design and flexible pipeline connections effectively reduces vibration and noise, operational noise below 80 dB(A)

Air-cooled high-efficiency permanent magnet motor

- Rotor no slip, no electric excitation, rotor no fundamental wave iron, copper loss and less heat loss, reduce the stator current and stator resistance loss
- The motor has a 5-8% higher efficiency compared to asynchronous motor of the same capacity and maintains high efficiency even when running at low speed

- Power: 7.5-15kW
- Pressure: 7/8/10bar

Single-Phase 220V Screw Air compressor

- **Power: 4kW**
- **Pressure: 7/8/10bar**

Oil Filter

The filter fineness is **25um**, which can guarantee the clean lubricating oil supply to the main system and improve the service life of the air end.

Frequency Converter

Makes the operation more stable & carrying out real-time vector calculation according to different air delivery.

Permanent Magnet Synchronous Motor

No electric excitation, **no fundamental wave iron**, less copper loss and less calorific value, whose efficiency is **5-12% higher** than that of the same capacity asynchronous motor.

Refrigerated Air Dryer

High efficiency with high precision pressure gauge.

SUPER ENERGY

MODER	POWER KW HP		PRESSURE BAR	CAPACITY M ³ /MIN	WEIGHT KG	OUTLET PIPE DIAMETER	NOISE LEVEL DB	TANK VOLUME
XLPM5.5AT	4	5.5	7	0.56	1100x520x1125	G3/4	/	/
			8	0.53				
			10	0.45				
XLPM7.5AT	5.5	7.5	7	0.76	1095x540x1377	G3/4	/	/
			8	0.72				
			10	0.63				

- The exhaust volume is measured under the rated exhaust pressure, according to the national standard GB3853 test (equivalent to ISO1217 appendix C)
- Recommend frequency 30%-100%
 - The above data is based on the standard grid-415V/50HZ

NON-STANDARD CUSTOMIZATION SERVICE SUPPORT

Please make further inquiry for the non-standard specification type and machines which are used under high or low temperature, high humidity, dusty working environment etc.

Suitable for small-scale factories, air protection industry, hardware industry, spraying industry, building decoration industry, etc.

Inflation

Painting

Pneumatic wrench

Car washing

220V single-phase power supply.
No threshold for use

APPLICATIONS APPLICATION AREA

Mining industry

Petrochemical industry

Cement industry

Spraying

Machinery manufacturing

Glass industry

Thermoelectricity

Metallurgical Industry

Food industry

Foundry industry

Incineration

Hardware decoration

Electronic industry

Pharmaceutical industry

Textile industry

Automobile 4S store

Automobile manufacturing

Injection molding

Pneumatic tools, control valves, general instruments, precision sandblasting

Precision industry, precision instrumentation, textile, chemical fiber process, general painting

Electronic industry, chip manufacturing, advanced coating, film industry, petrochemical industry

Hospital, respiratory, transport, pharmaceutical, mixing, aseptic packaging

Food industry, pharmaceutical industry, clean room test instruments

Chemical analysis, laboratory, breathing, ultra-drying, brewing industry, high-voltage electrical insulation, powder storage, optical lenses, electrostatic coating

CHOICE OF FORTUNE 500 COMPANIES

Open borders, grow together and continue to
create value for global customers
